

Martin's Top Ten

2011 Field Season

WARNING

The views, opinions, and pet peeves expressed in the following Power Point presentation are those of one extremely particular Western Region QA and do not necessarily reflect the concerns of other non-Western Region QA or their affiliates.

Number 10

SOPs not immediately available

Number 9

Actions documented prior to actual
occurrence

Correct by confirming that events occurred as described

Number 8

Recorded sample weights are not
accurate

Number 7

Stacked untreated plots without documented approval from SD

Plot map does not show which other trials share the UTC

Number 7

QA was made fun of

Number 6

Surfactant issues

No label inserted into FDB

Wrong rate used for tank mix

Number 5

SOPs were approved by management
before FRD signing them

SOPs become effective even though FRD hasn't signed them

Number 4

Additional personnel not added to
Part 2A

Any individual involved in the trial

Number 3

Overwrites all over the damn place

Number 2

Plot markers lack Field ID number

Incorrect Field ID number

Incorrect treatment number

Numero Uno

Sampling Issues

Samples were under-weight

Harvesting more than 50% of plot

Freezers unlocked
